

Campus Placement Analysis - Summary Report

Dataset Source: Kaggle - 'Factors Affecting Campus Placement' by Ben Roshan (Jain University)

Total Records: 215 students | 15 attributes

Objective

To identify academic and employability factors that most influence campus placements.

Key questions addressed:

1. Which factors influence whether a student gets placed?
2. Does academic percentage matter?
3. Which degree specialisation is most demanded by corporates?
4. How do salary trends differ among placed students?

All statistical tests were conducted to validate the findings.

Dataset Overview

- 215 student records (68.8% Placed, 31.2% Not Placed)
- Specialisations: Mkt&Fin (Finance), Mkt&HR (HR)
- Degree Streams: Comm&Mgmt, Sci&Tech, Others
- Includes academic %, work experience, employability test %, and salary

Exploratory Data Analysis (EDA)

- Students with higher academic scores (Degree% and E-Test%) were more likely to be placed.
- Work experience improved placement chances.
- Mkt&Fin specialisation had the highest placement ratio (~80%).
- Degree% and E-Test% correlated strongly with placement ($r \sim 0.5$).

Statistical Tests Conducted

- T-Test/Mann Whitney U: Degree% and E-Test% significantly higher for placed students ($p < 0.05$).
- Chi-Square: Work Experience, Degree Type, and Specialisation significantly affect placement ($p < 0.05$).
- Correlation: Degree% = 0.52, E-Test% = 0.49, MBA% = 0.33.

Logistic Regression Model

- Model Accuracy: ~87%
- Top Predictors: Degree%, E-Test%, Work Experience, Specialisation

- Work experience nearly doubles placement odds (odds ratio ~2.0).

Salary Insights (Placed Students)

- Average Salary: 2.5 - 3.0 LPA
- Highest for Sci&Tech > Comm&Mgmt > Others
- Mkt&Fin specialisation slightly higher average package (~2.8 LPA).

Conclusion

1. Academic performance and employability tests are key placement factors.
2. Work experience significantly improves placement probability.
3. Mkt&Fin specialisation and Sci&Tech degree holders are most in demand.
4. Salary outcomes reflect academic and experiential strengths.
5. Logistic Regression confirms strong predictive accuracy for placement.
